PROSPECTUS OF THE "NATIONAL MON-UMENT,"

A weekly journal to be published in Washington, under the sanction of the Washington National Monument Society. JAMES C. PICKETT, EDITOR AND PUBLISHER.

under the sanction of the Washington National Monument Society.

JAMES C. PICKETT, Editor and Publisher.

The Monument is intended to be aliterary, agricultural, and miscellaneous paper. It will contain selections of the literature of the day—the best that can be found in American and English publications: interesting scientific articles, embracing mechanics: foreign and domestic news; a synopsis of the proceedings of Congress, and every thing that such a journal might be expected to contain, with the exception of party politics, which will be at all times most rigorously excluded.

The Monument will be published for the express and the sole purpose of aiding in the erection of the noble column mow rising on the banks of the Potomac, in honor of the Father of his Country, and which every one who venerates the name of Washingtons would rejoice to see completed. After deducting out of the subscription the expenses of the journal proposed to be published, the remaining funds will be faithfully applied, and without reserve, to the purpose indicated. The aid, therefore, of all who are willing to contribute to so patriotic an object, and one so entirely national, is earnestly requested. By subscribing to the Monument, a valuable journal at a low price may be obtained, while it will be doing something, at the same time, towards completing that majestic memorial of the Nation's gratitude.

The Board of Managers recommend Mr. Pickett, formerly Fourth Auditor of the Treasury and Charge d'Affairs to Peru, who proposes to edit and publish the Monument fournal, as one well quantified to perform the duties of aditor, and to conduct the paper faithfully, and satisfactorily to the subscribers. They assure their fellow-different fournal, as one well quantified to perform the duties of aditor, and to conduct the paper faithfully, and satisfacingly and satisfactorily to the subscribers. They assure their fellow-different with his own means and at his own risk; if successful, he will receive nothing more, and he asks nothing more,

copies, \$15; &c.

Those who are disposed to patronise the Monument are requested to forward their names to the General Agent, without delay. The first number will be published early in May, and the second on the second day of August, and weekly thereafter; time being allowed for the Prospectus to be circulated, and for the agents to make returns. As all subscribers will be contributors to the Monument itself, their names will be published in the paper.

Austin's Magic Freezer,
Through in six minutes. For the preparation of
loe Creams, Water Ices, &c.—Patented Sep-

loe Creams, Water Ices, &c.—Patented September 19, 1848.

THE distinguising merits of this Apparatus are—

1st. The astonishing rapidity of the process, surpassing belief—hence the name.

2d. The Cream during the progress of freezing becomes charged with atmospheric air, by which it nearly doubles in bulk, and obtains that peculiar smoothness, lightness, and delicacy of flavor, for which the Ice Cream of our best Confectioners is so highly prized.

3d. It does not require a tenth part of the labor that the common Freezer does.

4th. It does its work better, producing a better article, in every respect, than by any other mode.

5th. There is a considerable saving in ice, as the tub meeds no replenishing during the operation.

The annexed testimonial from the Proprietor of the Eutaw House will put to rest all doubt.

"Having witnessed the process of freezing Ice Cream in Austin's Magic Freezer, two quarts of Cream having been frozen in the incredible short time of six mitutes, I cheerfully recommend it to the public."

H. F. JACKSON,

cheerfully recommend it to the public."

Eutaw House, Baltimore, May 15, 1848.

"This is to certify, that during the summer of 1848, I used one of Austin's Patent Ice Gream Freezers of the largest size, (10 gallons.) making from 10 to 50 gallons per day during the senson; and so far as regards expedition and power, I consider it decidedly the best freezernow in use, as I have had with it no difficulty in making ten gallons of superior quality Ice Gream from five of plain Gream, in thirty minutes from the time I commenced working it.

Newark Academy.

Newark Academy.

By a late re-organization of this department of Delaware College, the Board of Trustees have taken measures to place it upon a new and improved foundation, and to endow it with advantages possessed by few similar institutions in the country. The Academy, heretofere merged in the College, and of course subjected to all the wils which have been found to attend the amalgamation of the two departments in the same building, and under the same government, now enjoys the privilege of a separate establishment, without losing those which result from its relation to the College proper.

A large and elegant edifice, with all the necessary fixtures of a complete boarding establishment, has been creeted and furnished, in which the students of the Academy board, under the immediate charge of the Principal and his Assistants; and all lit exercises are conducted on a system of its own, uninterrupted by the interests or operations of the other department. The furniture of the study-rooms and dormitories has been chosen with peculiar reference to comfort and convenience for study; and no expense, has been spared in providing the apparatus necessary to render the means of instruction complete; giving to Newark Academy facilities for privote study and comfortable accommodation of students, fully equal to those afforded by many of our colleges.

From its intimate relation to the College, students of the Academy enjoy many advantages not generally obtained at institutions of this kind. Those who wish to pursue some particular branch which falls more properly within the College course, may be admitted to recite in any of the College classes. Students also of proper age and discretion, by recommendation of the Principal, and permission of the Faculty, may enjoy the use of the College labora. Heading Lating, Puel, Light, &c., with the little in the Academy facility is the proper of the College of the College as can be profitably enjoyed by scademical students.

WILMINGTON BOARDING SCHOOL

FOR BOYS.—This institution as situated in one of the healthiest parts of the city of Wilmington, entirely beyond the settined portions of the town. The uniform healthfulness of the location may be inferred from the fact that, since the cetablishment of the School, about twenty-eight years, very few cases of serious indisposition have occurred among the pupils, and not a single death either here, or from diseases contracted while here.

The course of instruction includes, besides the ordinary English branches, Natural Philosophy, Chetalstry, Physicology, History, Rhetoric, the various branches of Mathematics and their application to Mechanics and Engineering; the latter and Surveying are taught practically by field operations. It is helieved that, in this respect, the Institutions will compare favorably with any similar one in the country. A carefully selected library, of more than one thousand volumes, containing works on the various branches of Literature and Science, furnishes, ample reading matter; while a Laboratory, fully supplied with apparatus and tests, contains all that is necessary for practical instruction in Chemical Manipulation.

The school year commenced on the third Second-day (Monday) of the Ninth month, (September.) and is divided into four quarters of eleven weeks each, leaving a vascini month (July).

MORE HOME EVIDENCE.

The Testimony of one of our lawyers.—

Mr. Jas. L. Hamilton—Dear Sir. Although the number and respectability of the testimonials of which we defice, "THE GREAT VA. REMEDY," in the diseases which it is designed to cure, are sufficient, in my opinion, to establish its reputation, and secure for it such patronage as will adequately reward you for the discovery of so inestimable a Medicine—yet the great benefit which I have derived from its use, and the salutary effects which I have witnessed from its employment in the cases of several friends, to whom I had recommended it, constrain me to contribute, for such use as you may think proper to make of it, this formal acknowledgment of its sanitary virtues. My own case was Dyspepsia of long duration, and very aggravated in its character, manifested by an almost total destruction of the digestive functions, great debility, nervousness, emaciation, and impaired appetite, with pain, and a burning sensation in the left side of the cheest, palpitation of the heart, vertigo and congestion in the head, and many other symptoms indicative of the worst type of the disease, by the use of three or four bottles of your preparation, been entirely relieved. The cases of my friends, in which your Medicine was taken, were Dyspepsia, Chronic Headache, and Sore Throat, in all of which it proved efficatious, after the trial of a vast number of other remedies without benefit. Your medicine is as pleasant to the taste as a cordial, and in my experience corrects all derangement of the stomach, restores the wasted or enfeebled energies of the digestive organs, and imparts strength and reanimation to the whole system.

Very respectfully, yours, &c.,

English Common Law Reports,

58 Folumes, with a complete Index to the first 47 Volumes.

Since volume 39 of this series, The English Common Law Reports have been reprinted in full. With volume 44, we commenced binding each English volume separately, instead of, as formerly, two English in one American volume. Price—For the first 43 vols., \$3.50 per vol.

For the succeeding, 250 "The reputation which these Reports maintain in England and in the United States is known to all the Profession. The low price at which they are offered, compared with the rates of some of the principal American Reports, of even inferior merit, recommends them particularly to the attention of those purchasing Libraries.

A General Index to the first 47 Vols. of the English Common Law Reports.

By Hon. Genere Sharswood and George W. Biddle, Esque. 1 vol. 8vo.—\$5 00.

With this Key to their contents, the English Common Law Reports present to the Profession a mass of legal learning in the shape of Opinions, Data, elaborate Arguments, &c., &c., sufficient, probably, for the Elucidation and Prosecution or Defence of any case that can arise in our Courts of Law; and being thus made easily and instantly accessible, these Reports will be found so comprehensive, convenient, and cheap, as to supersede the necessity of other or more expensive scales.

The Index will be found of great value to all possessing the Reports; and of great convenience to those having access to, but not owning the series.

Mesers, T. & J. W. Johnson emen-In reply to your letter, I can with great sincerity say, that I enteriain a very high opinion of recent Exchequer Reports. In my judgment they are not excelled by any cotemporaneous Reports, in learning ability, or general utility and interest. The cases decided are discussed with great care, and expounded with uncom mon force. I scarcely know of any volumes which I deen of more importance or value for a Professional Library.

JOSEPH STORY.

Cambridge, January 25, 1845.

Gentlemen: Your letter of the 24th has been received, in which you ask my opinion as to the value of the English Exchequer Reports, from Price downwards to this time, to an American Lawyer, and as to the expediency of reprinting them in this country. Of the high value of these Reports, both on the Pleas and Equity sides of the Court, I have not the least doubt—the decisions of this Court for the last fifteen or twenty years, both at Equity and in Common Law, being entitled to equal respect with any others in England. I should think an American Lawyer's Library essentially incomplete without them.

Lam, gentlemen, very respectfully yours, SIMON GREENLEAF.

Pourth Series—Porty Volumes.

Twelve Dollars a year, bound—Ten Dollars in Numbers.

The cheapest Law Periodical in the United States.

It is our determination to make the Law Library the cheapest series of reprints of English Law publications in this country. The Editorial Department will, we trust, be found fully to realize the expectations of those who have enjoyed Smith's Mercantile Law, Touchstone, Broom's Legal Maxims, Archbold's Niel Prius, Archbold's Landlord and Tenant, Crabb on Real Proporty, Smith on Contracts.

The high reputation which the "Law Library" has acquired throughout the United States, by the character of its volumes, and by the cheap rate at which its valuable contents have been presented to the Profession, is the best evidence we can offer of its merits and its claims for your support. We hope, and will aim, to retain this high character.

British Crown Cases Reversed.

Three Volumes—49.
From 1796 to 1840—To be continued.
The Decisions upon the Crown Cases reversed for the consideration of the Twelve Judges of England, are of the first importance to the due administration of the criminal justice of the country; and in committing to the press those which have occurred during a recent period of more than forty years, the publishers believe that they are making an acceptable communication to the Profession and the public.

The three volumes already published contain all the Reversed Cases since Leach.

BALTIMORE AND WASHINGTON RAILROAD.

BALTIMORE AND WASHINGTON RAILROAD.

On and after WEDNESDAY next, 9th instant, the station on Pennsylvania avenue will be vacated, and the new one on New Jersey avenue occupied.

The Passenger trains will leave the latter, commencing at 5 p. m., as usual, at 6 and 9 a. m. and 5 p. m. as usual, at 6 and 9 a. m. and 5 p. m. at 6 a. m. and 5 p. m. In making this change, the undersigned desires to call attention to the rules of the Company, in regard to the reception and delivery of merchandise:

1st. Shippers are reminded, that in all cases a bill with full directions should accompany the goods.

This is for the protection of both parties, and unless compiled with the goods cannot be received.

2d. Consignees are notified that all merchandises must be removed on the same day upon which it is received, as the Company cannot hold itself responsible for any thing left in its house during the night.

The hours for reception and delivery of merchandise are from 8 a. m. till 4 p. m.

The undersigned takes occasion to remark that these are not new regulations, but he has been compelled to call attention to them from their frequent violation, which has caused much and serious inconvenience.

FURNISHING MAIL LOCKS AND KEYS.

PURNISHING MAIL LOCKS AND KEYS.

Post OFFICE DEPARTMENT,
March 14, 1851.

It being desirable to substitute locks and keys of some other kind for those now in use for the mail service of the United States, specimen locks and keys, with proposals to furnish the same, will be received and considered at the Post Office Department until the first day of July next. The different locks will be submitted to a commission for examination and report. Upon this report, contracts will, as soon as practicable, be entered into for furnishing such locks and keys for four years, with the right on the part of the Postmaster General, for the time being, to extend and continue the contract in force for an additional term of four years, by giving to the contractor a written notice to that effect, not more than nine nor less than six months before the termination of the first term of four years. on the part of the Postmaster General, for the tip

tional term of four years, by giving to the contractor a written notice to that effect, not more than nine nor less than six months before the termination of the first term of four years.

With a view of procuring the best lock at the lowest price, no kind of lock is prescribed as a standard, the Department relying for a selection on the mechanical skill and ingenuity which a fair competition, now invited, may develop. It is, however, proper to state that a lock suitable for the mail service should possess the following qualities, viz: durability, uniformity, lightness, and strength. For the purpose of displacing simultaneously all the mail locks and keys now in use, about thirty thousand new locks and keys now in use, about thirty thousand new locks and twenty thousand keysadapted thereto will be required to be furnished by the contractor within seven months after the contract shall have been entered into; afterwards the annual supply will depend on the durability of the locks and keys adopted, as well as the increase of the mail service; but it will probably never exceed in amount three thousand of the former and one thousand of the latter.

No lock will be considered if it be like any already in general use; nor will any one with whom the contract may be made be allowed to make, sell, or furnish, any lock or key similar to those contracted for for any other purpose or use than that of the Post Office Department.

The kind of lock adopted must be patented, and the patentee will be required, on entering into contract, to make an assignment of his patent for the exclusive use and benefit of the Department, if the Postmaster General shall deem such requirement essential to the interests of the service. In case of the failure of the contractor at any time to fulfi faithfully the terms and conditions of his contract, the Postmaster General may deem it expedient to select for the through mails the lock of one bidder, and for the way malls that of another. He reserves, therefore, the right of contracting with differ

Letter from the Hon. Henry Clay.

Ashland, 20th July, 1849.

Dear Sir: I wish to express to you the gratification I derived on receiving the July number of the Merchants' Magazine and Commercial Review, from viewing your portrait in the beginning, and from reading your address to your friends at the end of it. When we feel under obligations to those who have contributed to our information and amusement, we are naturally desirous to possess all the knowledge of them, of their appearance, of the features of their countenance, and of the character and habits of their mind, which we can acquire. You have placed your numerous readers (at least you have me, if I may not speak for them) under those obligations; and the number of your valuable work now before me, in some degree, satisfies the desire to which I have alluded.

I have become quite familiar with the Magazine and Review, and have no heastation in expressing my humble opinion that it is emisently entitled to the public regard and support. It collects and arranges, in good order, a large amount of valuable statistical and other information, highly useful not only to the merchant, but to the statesman, to the cultivator of the earth, to the manufacturer, to the mariner, in short, to all classes of the business and reading community.

Entertaining this opinion, I am glad that thus been, and hope that it may continue to be, liberally patronized.

Offering you cordial assurances of my esteem and regard, I am truly your friend and obedient servant, Freeman Hunt, esq.

Extract of a letter from Hon. Millard Fillmore.

"I have read it (Merchants' Magazine) with a good deal of attention, and have no hesitation in saying that I think it one of the most valuable periodicals that was ever published. To the merchant was a grand reportion of useful facts and information, which can be found in where so well digested and so accessible as in these numbers. I only regret that I do not own the who

ELASTIC\* UNIVERSAL TOUCH.

WISE & BROTHER, Manufacturers of Boudoir, Grand, and Square Pianos, request those who would be assured of a first class Piano, one that lades can perform on with the greatest possible advantage—one that the touch can be instantly adjusted to the exact strength of the fingers and movement of music, one that will stand in concert tune, one that the tone will not become shrill and grating, that is chaste of style and elegantly made up of straight and regular curve lines, that will last an age—to give them a call. The ancient standing of the Baltimore Factory, and liberal patronage of citizens and others of the first order of artistic taste and science, conceded at once the most critical, have been fully anticipated. Their recently finished Grand Piano, minutely reviewed by the most accomplished civil engineers and master artists, has been denominated truly a Grand Piano; also, that their late Boudoir, for style, power, and compars of tone, is not surpassed, if equalled, in the world. Friends and customers, please stop in and examine for yourselves.

COLD SPRING WATER CURE.

COLD SPRING WATER CURE.

THIS NEW AND SPLENDID ESTABLISHMENT for the scientific treatment of the various diseases with which the human system is afflicted, is situated about three miles from the city of Buffalo, in a rural spot, and so accessible from all points as to be reached without inconvenience or delay.

A line of omnibuses runs from the steamboat landings in Buffalo to the springs every ten minutes.

The house and grounds are near the extensive and beautiful green-houses and unseries of the Messrs. Hodges & Bryants; and the scenery in all directions is unsurpassed, as regards either variety or beauty; embracing points of view, from which may be taken in at a glance the broad expanse of Lake Erie, the Ningara flowing majestically towards the Falis, extensive forests, and the "Queen City of the Lakes," with its moving panorama of steamboats and ceaseless enterprise.

The water, taken immediately from the celebrated "Cold Spring," is unsurpassed as regards coldness and purity, by any in the United States. The house, recently erected at a cost of about seven thousand dollars, has been fitted up in a neat and elegant style, at considerable extra expense, and is sufficiently expansion to accommodate seventy-five patients.

Connected with the establishment, and constituting one of its attractions, are the fixtures and conveniences for innocent and healthful gymnastic exercises.

And the friends of the establishment deem it a matter of folicitation that the services of Miss Mary M. of the various forms of disease, and constructed on a scale not inferior to those of any other establishment in this country.

An enlightened public sentiment has everywhere repudiated a reckless use of drugs in the treatment of disease; while intolerable sufferings and broken constitutions have imperatively demanded "Reform." A return from a wide and fatal departure from the simplicity of Nature's laws is called for, alike by a rational love of happiness and the deplorable exigencies of our condition. Hydropathy, or a scientific use of water as a restorative and surative agent, is a practical substitution of a simple and remarkably efficacious mode of curing the sick; for that system of drugging, depleting, and canterizing, which, in obtaining the mastery over disease, too frequently places the patient beyond the reach of further annoyance. The success of the various Water Cure establishments in this country, to say nothing of any other, has fully confirmed the hopes of the early discoverers and promulgators of the great truths upon which the system is founded, and renders verbal communications unnecessary. It is deemed sufficient to say, that the "Cold Spring Water Cure" will compare favorably with any of the well-conducted establishments of a similar character, and will be found squal to the best, as regards the order, convenience, and desirableness of its arrangements. The institution is now open for the reception of patients, and in full operation.
